

# Station Approach Construction Update

26 June 2026

## Recent progress

The new pedestrian refuge island near the Seadog Pub has now been completed, and the adjacent footway has been paved. The new gully in the same area has been connected to the existing drainage network, with the new crossing signals to be installed at a later date. Phase 2 is now complete, and works will move to the next phase of the scheme next week.

The crossing point on Station Road, opposite the Seadog Pub, is now 90% complete, with new paving slabs and tactile paving installed.

## What's happening next week

Excavation works will start on the next phase of the scheme which is located on the south side of Devonshire Road, in between Middle Street and Havelock Road (Phase 3).

The remainder of the paving at the crossing point on Station Road will be installed, which will complete this area.

## Traffic management in place and coming up

From Tuesday 26 May there will be temporary traffic signals in place 24 hours a day until 14 August. During this period, we will be carrying out the majority of the works, including, paving and resurfacing footways, installing new pedestrian refuge islands, drainage adjustments and associated activities such as kerbing and pedestrian guard rail adjustments.

From Monday 31 August overnight road closures will be in place between 8pm and 6am while we carry out carriageway reconstruction and resurfacing.

During these closures, traffic will be diverted via Cornwallis Terrace, Baybrook Road and South Terrace.

This diversion route is not suitable for HGVs or large vehicles. An alternative diversion will be in place via the A21 and A2101 St Helens Road.
