Denton Corner Construction Update

Mount Road, Avis Road, Seaford Road

9 October 2026

Recent progress

The installation of new drainage gullies and associated kerbing works at the bus interchange has been completed. Following completion of these works, the interchange carriageway was surfaced with tarmac.

Excavation works have been completed for the interchange maintenance lay-by and the designated location of the new bus stop and shelter. Installation of new kerbs and edging kerbs in these areas has begun.

Installation of tactile paving has begun at the Seaford Road crossing and the new crossing points within the bus interchange. The former footpath alongside Avis Road and Seaford Road has also been removed, as the new pedestrian route will pass through the interchange.

What's happening next week

The footpath on Mount Road adjacent to the new interchange will continue to be removed to allow for the new footpath and crossing to start to be installed.

Tactile paving installation will continue at the crossing points, alongside preparation of the footway sub-base. Grasscrete paving will also be installed in the maintenance lay-by. Grasscrete consists of reinforced concrete with openings that allow vegetation to grow through while supporting vehicles and protecting the verge.

Traffic management in place and coming up

A reduced speed limit is currently in place on the A259 Seaford Road to help keep site staff safe.

The pedestrian crossing on the A259 Seaford Road is also temporarily closed while work continues in the area, with the diversion route via the crossings on Drove Road and McKinlay Way. This closure will remain in place for the duration of the project.
