East Sussex Highways

Balfour Beatty

East Sussex County Council

We're winter ready

From **1 October** to **30 April**, we monitor weather conditions and respond to frost, ice and snow to help keep East Sussex moving.

Weather monitoring

MetDesk forecasts and weather station data helps us decide when and where treatment is needed.

Gritting routes

We treat key routes when ice or snow is forecast, focusing first on roads that are heavily used or vital for connectivity.

Snow clearance

When snow becomes deep enough, gritting vehicles are fitted with ploughs.

Severe weather

During prolonged or severe conditions, we increase our response and prioritise access for essential services.

Community Support

We check and fill all highway-owned grit bins.

Updates and advice

Find gritting routes, grit bin locations and winter safety advice on our website.

Please remember: we cannot treat every road, and a gritted road can still be icy. Always check the forecast, allow extra time and drive to the conditions.
