

# Uckfield Bus Station Improvements

East Sussex Highways are working in partnership with East Sussex County Council, Wealden District Council and Uckfield Town Council to develop and implement improvements to the existing bus station to create a Mobility Hub. The proposed improvements at the bus station will include:

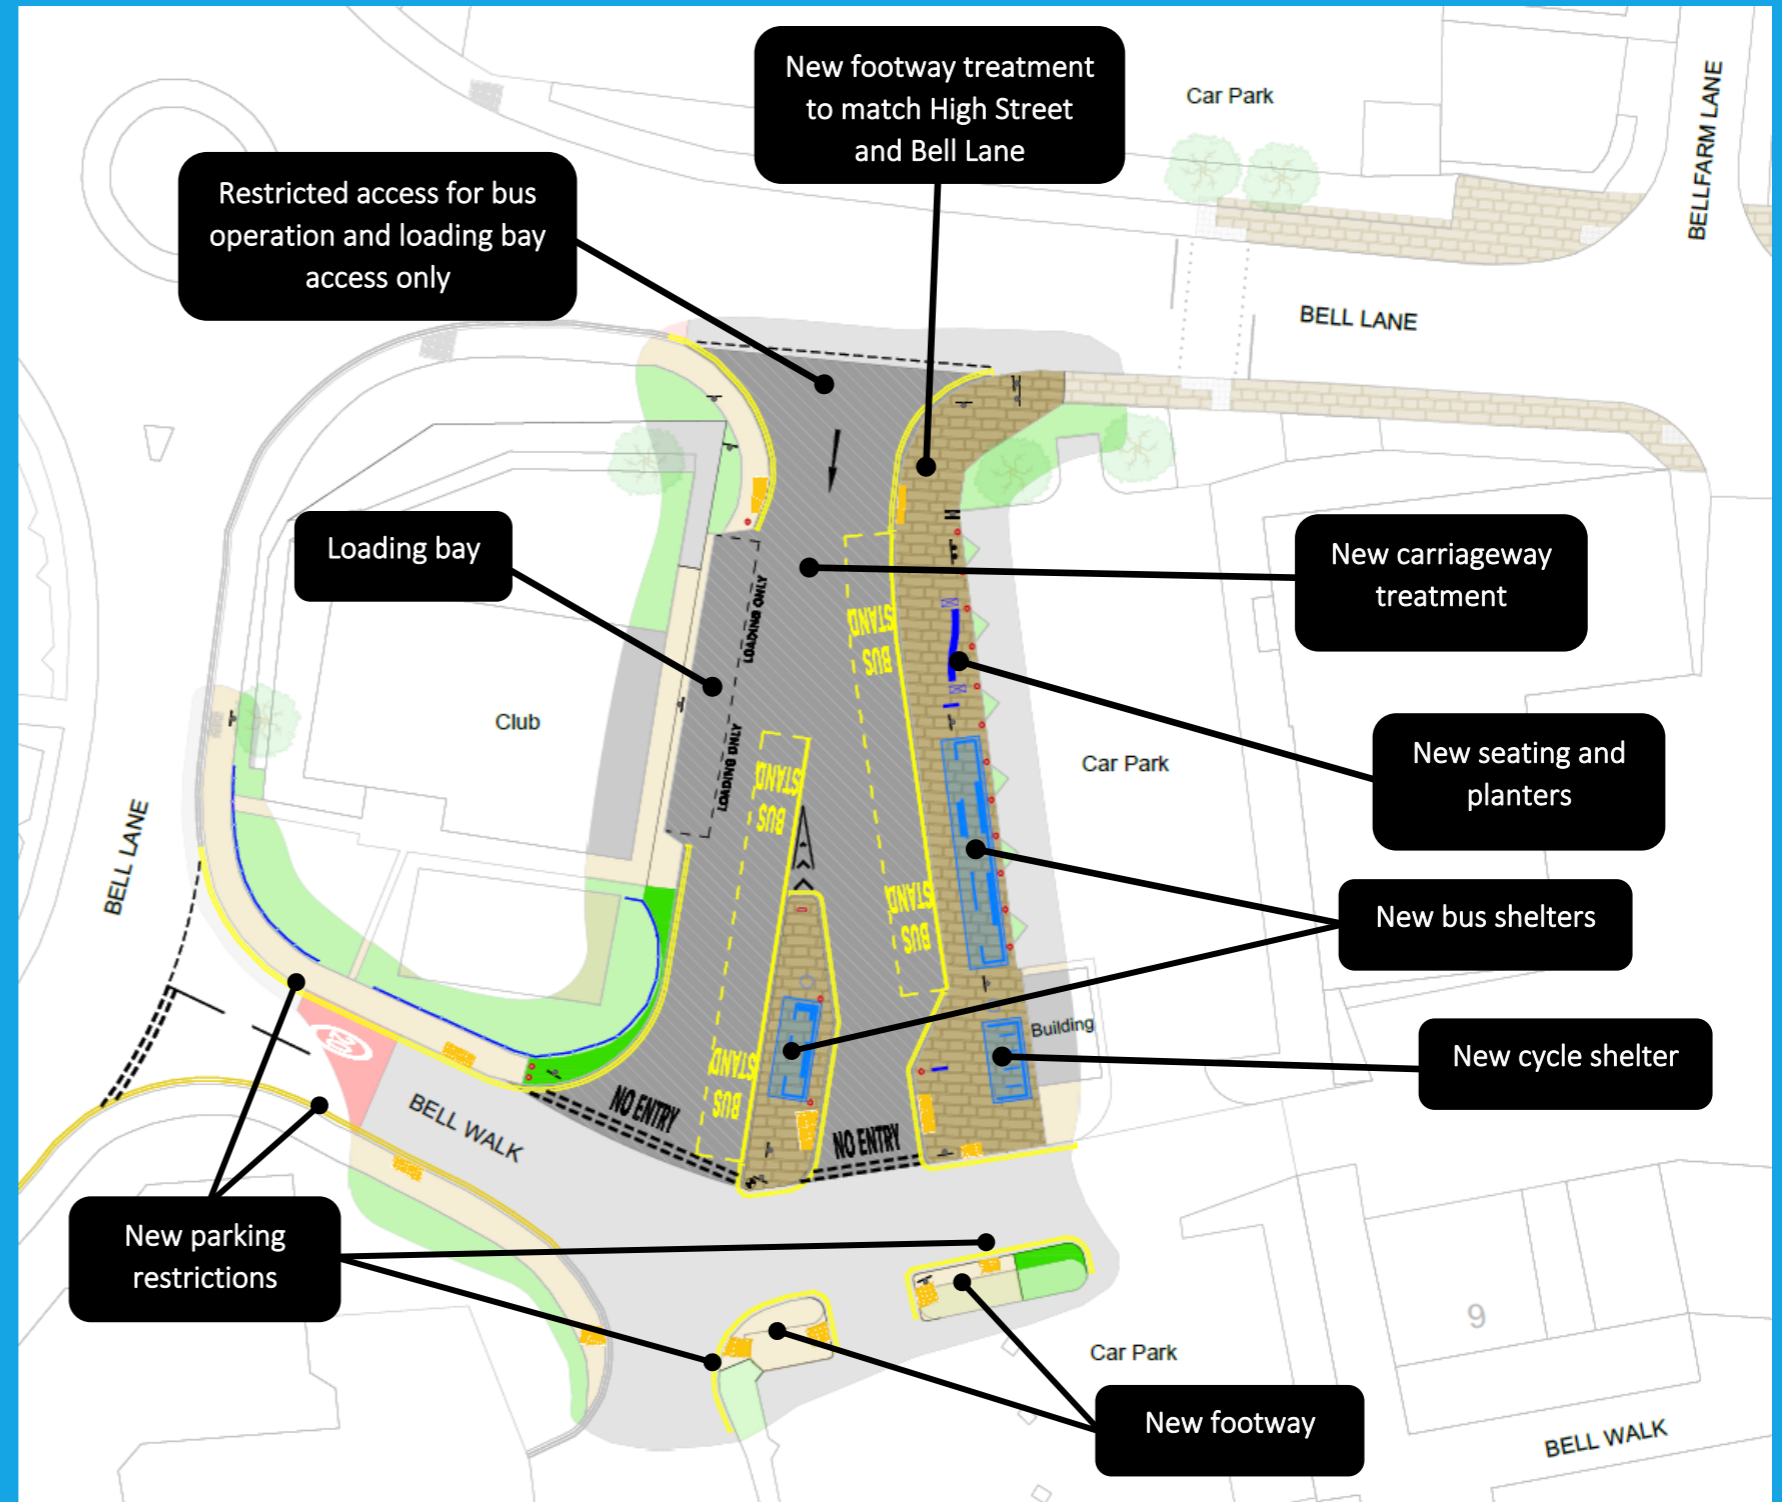

- Two new high quality bus shelters, including upgraded seating provision with wireless charging, free Wi-fi, real time travel information screens and a 'living roof' with sedum planting
- New cycle shelter
- New footway and carriageway treatment, with kerbing and paving to match the High Street
- Construction of a new pedestrian footway along the south side of Bell Walk
- Increased capacity to accommodate 4 buses
- Enhanced pedestrian direction signage and street furniture, including a new bench, planters and bins
- Street lighting upgrades

We are planning to advertise new Traffic Regulation Orders (TROs) to better manage the parking and vehicle movements in and around the bus station. These include formalising the one-way system into the bus station, introducing a 20mph speed limit and new parking restrictions on Bell Walk.

We plan to commence construction on this scheme in summer 2024.

For further information about the scheme and to make comment on these proposals please visit the East Sussex County Council website at:
